

# PROTOS

## The First Solution

<b>ISO 9001:2015 Leadership Overview (1-2 Hours)</b>	A course finally developed for the C-Suite, not too long but packed with good information needed for executive involvement with DNV-GL accreditation.
<b>ISO 9001:2015 Educational Overview (1 Day)</b>	This course is a great introduction to ISO 9001 for staff and provides an overview of the ISO 9001 standard with a focus on healthcare. The material allows Protos to deliver previous ISO requirements through the new lenses of "Risk Based Thinking". This session is a great opportunity to engage with your team and provide a session of interactive learning and consulting.
<b>ISO &amp; NIAHO System Management (2 Days)</b>	This course is the answer to the ISO & NIAHO course offered by DNV-GL which was originally created by founder of Protos. This course is designed with a Leadership Overview for the first two hours then moves into a comprehensive overview for hospital staff. The environment promotes a great forum for questions and consultative insights for the DNV-GL transition. With the course designed to deliver both a Leadership Overview and Staff Education, this course becomes the perfect choice for budget.
<b>ISO Internal Auditor Training (2.5 Days)</b>	This course is an essential part of any healthcare organization's curriculum. It provides the basis for evaluating an organization's ISO 9001 system from an internal perspective to determine conformance and identify opportunities for improvement. One essential activity includes an ISO 9001 standard review, which will help transform this document into the world of a healthcare professional. The course is comprised of interactive presentation, case studies and hands-on audit practice.
<b>ISO 9001:2015 Consulting Services</b>	The consultative session will be determined by the organization; however we recommend starting with an off-site review of the six ISO 9001 procedures and quality manual. Based upon the length of courses Protos will deliver consultative feedback during the course presentation, mock survey or consultative overview with key members of your team.

## *Transition made Easier*

1. The information above is abbreviated descriptions and applications for the courses and services, full descriptions are available on the Protos website.
